

ColorScape® CP-1

Surface Treatment for Precision Wet Cast Paving Slabs

Features and Benefits

- Deeper, richer color hues.
- Significantly reduces dusting and chalkiness that may be visible on wet cast paving slab surfaces.
- Sustains color fastness over time.
- Improves resistance to acid rain.
- Resistant to light and moderate abrasion from foot traffic.
- Applied before paving slabs leave the manufacturing facility. Protection is in place before the paving slabs reach the jobsite.
- Water based and environmentally friendly.

Guidelines for Use

Application Rate: ColorScape CP-1 coverage rate will vary depending on the quality of the paving slab surface and the desired benefits..

Coverage range is 300 - 1000 sq.ft/gal.

Typical coverage rate is 500 sq.ft/gal.

Please consult with your Technical Services Representative for more information.

Product Storage and Shelf Life

Freeze Protection: ColorScape CP-1 must be protected from freezing. Do not store at temperatures below 32° F (0° C). The admixture is not usable after it has frozen.

Protect from Direct Sunlight: ColorScape CP-1 must be protected from direct sunlight. DO NOT store where container is exposed to direct sunlight.

Shelf life: One year in original unopened container.

Description

ColorScape CP-1 is a component of the ColorScape® Durabold® System and improves the optical properties of wet cast concrete paving units with deeper, richer color hues and improved color fastness. ColorScape CP-1 is applied inline during the manufacturing process before paving slabs leave the production facility.
