

ColorScape® DS-1

Dry Side Surface Treatment for Dry Cast Pavers & Slabs

Features and Benefits

- ColorScape DS-1 is applied inline on the dry side during the paver manufacturing process.
- Highly recommended for white and lighter color pavers.
- Superior stain resistance to household and driveway stains.
- Superior acid rain resistance.
- Highly recommended for commercial and architectural projects.
- Resistant to light and moderate abrasion from foot traffic.
- Slight gloss appearance.
- Water based and environmentally friendly.

Guidelines for Use

Application Rate: Coverage rate will vary, depending on the quality of the paver surface and the desired benefits. Coverage range is 300 to 500 sq.ft/gal. Typical coverage is 400 sq.ft/gal. Due to variations in local materials, paver absorption and project requirements, coverage rates outside the recommended range may be required. Please consult with your Technical Services Representative for more information.

Recommended Application Method: ColorScape DS-1 is applied inline on the dry side with specialized equipment during the manufacturing process. Treatment is IR cured into the paver surface.

ColorScape EverBold System: ColorScape DS-1 is only recommended for use with ColorScape integral admixtures.

Product Storage and Shelf Life

Freeze Protection: ColorScape DS-1 must be protected from freezing. Do not store at temperatures below 32°F (0°C). The treatment is not usable after it has frozen.

Protect from Direct Sunlight: ColorScape DS-1 must be protected from direct sunlight. DO NOT store where container is exposed to direct sunlight.

Shelf life: One year in original unopened container.
